

Product Overview

MT9V111: CMOS Image Sensor System-on-Chip, VGA, 1/4"

For complete documentation, see the data sheet.

This complete camera system-on-a-chip solution requires only a power supply, lens, and clock source for basic operation. With very low power consumption and variable functions, including gain, frame rate, and exposure, this sensor outputs high-quality images at high speeds and can be programmed through a simple two-wire serial interface.

Applications

- Automotive
