MTSMC-MNA1-U-SP	Embedded LTE Cat M1 Modem/USB w/GNSS (AT&T/Verizon)) (1 Pk)

### III. Type of Change

Release of new radio firmware and modem controller code resulting in new ordering part numbers.

### IV. Current and New Firmware Versions

#### Current Radio Firmware Version

30.00.XX3

#### New Radio Firmware Version

30.00.XX8

#### Release Notes

Full release notes for the radio firmware are available [here](#).

#### Changes to Modem Controller Code

- Modified the reset function to improve memory protection. The reset function is invoked by holding the reset line low for 50ms-1s.
- Removed resetting of the radio after it has been powered down for 60s. This prevents interference with modems that support Power Save Mode (PSM). With this change, if AT#SHDN is issued, a power cycle or reset is required to power on the radio.

#### V. New and Old Ordering Part Numbers
